

Printing Information: Please provide your files in the form of CD-ROM (tiff, eps, ai, or psd file) along with a hard copy of the design or section of the design. All files must be at least the pixel dimensions shown below to ensure a sharp quality print at 300 dpi. The quality of the print will depend on the quality of the image supplied. This is just a rough estimate of image size requirements, all projects will be considered individually. Marlite is not responsible for the clarity of images when not provided high resolution files.

Image Size Requirements:

Panel size	Total image size If borderless, image will run over the edges of panel)	Image size displayed on front of panel
