Introducing an all new multi-dimensional panel from Marlite!
Volta - Artistic Dimensional Panels help create Bold Exciting Wall Statements

Dover, Ohio - Marlite Inc. has introduced Volta - Artistic Dimensional Panels that offer infinite possibilities to complete your design vision.

Consistent, contiguous flowing patterns to create bold exciting statements for walls. More than just a gouged mdf panel, Volta's line of decorative panels are "sculpture" for walls! The decorative carved mdf panels are finished to meet custom specifications. Painted, powdercoated, vinyl laminated or printed finishes are available.

With virtually no limitations to creativity, Marlite's in-house designers will assist in designing Volta patterns with maximum impact. Volta carved panels can be sculpted in single-panel or multi-panel configurations and matched to the length of any installation.

When used with a variety of installation methods and techniques Marlite provides systems that are both creative and functional. Volta can be installed using Marlite Myriad or wood/metal cleats.

Marlite has also incorporated Visplay retail solutions into the Volta panel selections. Visplay from Marlite is the perfect solution for single point, vertical, or horizontal retail merchandising wall system panels. The same solutions can work with floor fixtures as well. Contact Marlite with your requirements and we will work with you for the right texture, finish and retail solution.

For more information about Volta Artistic Dimensional panels and Marlite's complete ensemble of wall systems and retail display products, call 800-377-1221, or visit www.marlite.com.

Marlite is a privately owned, leading manufacturer and distributor of retail merchandising and designer wall systems. In addition to retail chains, Marlite provides products and systems to distinct commercial markets such as education, healthcare, transportation, government and many more. Founded in 1930, Marlite has its primary manufacturing plant and headquarters in Dover, Ohio and has additional fabrication and distribution centers in California, Florida and Texas as well as Ontario, Canada. The company is also the sole North American manufacturing licensee and distributor for Visplay International GMBH.
