

Symmetrix™ SmartSeam

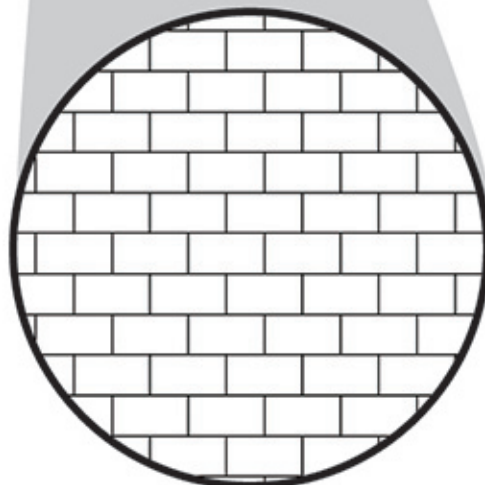

—FRP Panels—

SmartSeam eliminates traditional panel joints for a clean, continuous look.

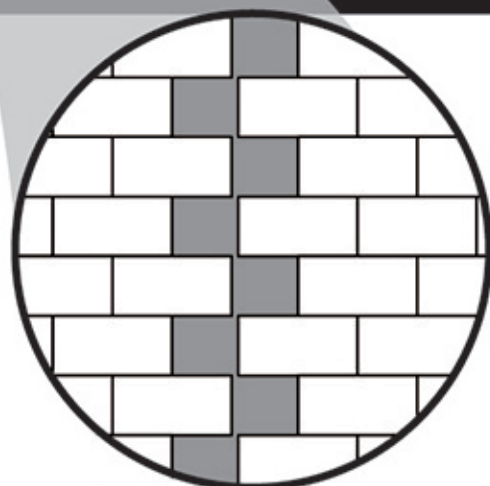

Smokin' New Designs!

Cool new looks that are sure to be hot.

Hidden Joints!

These joints are harder to spot than a speakeasy.

Lightning-Fast Installation!

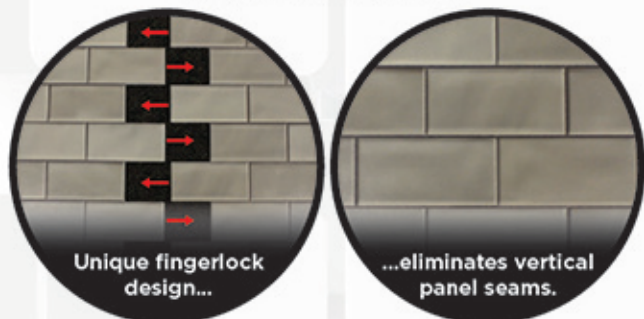

Flash! No more division molding or silicone seams.

Stunning tile look, without the hassle and cost of tile.

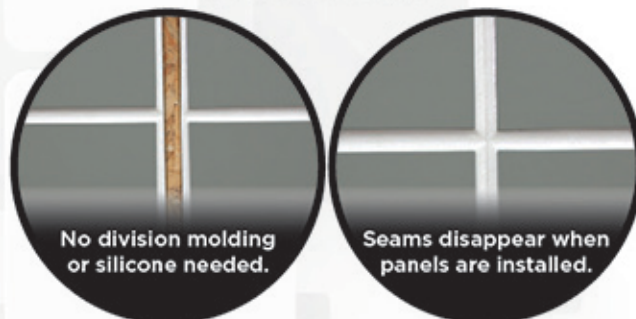

Wait. What??

Marlite's patent-pending SmartSeam technology is a game changer for anyone looking for the look of tile without the cost of tile installation and time-consuming maintenance. Exclusive finger-lock sheets hide joints and make lining up patterns and grooves a snap. And Symmetrix™ can be installed over virtually any surface.

Fingerlock Panels

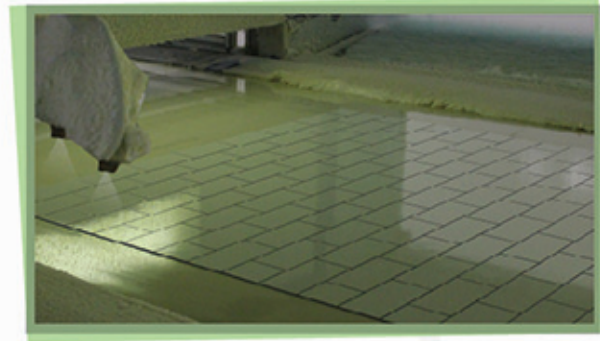

Beveled Edges

How we do it...

Cutting-edge CNC technology grooves Symmetrix™ FRP panels with extreme precision, ensuring every panel has a seamless fit and appearance.

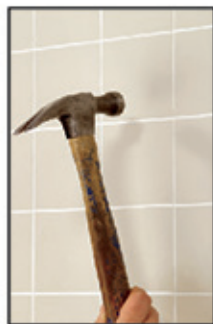

Marlite's Sani-coat sealer is spray applied to add that extra layer of durability, plus stain and mildew resistance.

Features & Benefits.

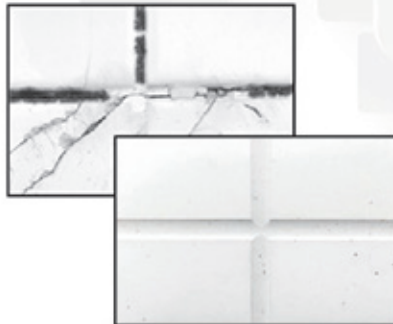

Easy Peasy.

Installs in hours, not days over nearly any surface including existing tile.

BAM!

Fiberglass core provides serious impact resistance.

Tough Stuff.

Won't crack like ceramic tile grout, resists stains, mold, & mildew.

Wipe and Go.

Sani-coat Sealer makes entire surface easy to clean.

Panel Information

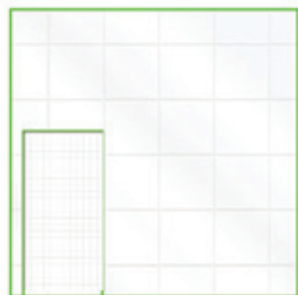

4'x4'x3/32" (nominal) - Interlocking Designs

4'x8'x3/32" (nominal)

Class III/C Fire Rating. Meets USDA/FSIS requirements.

The advantage is yours... right now!

The SmartSeam Advantage

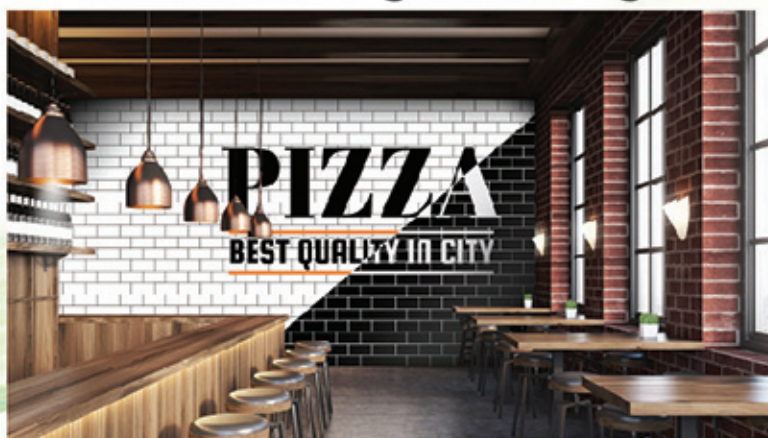

Set your imagination free. We've got your tile vision covered.

Symmetrix™ with SmartSeam technology also gives you unheard of flexibility to design and create amazing spaces. Add graphics, replicate natural surfaces, and even add photographic elements. Thanks to Marlite's BlueSky™ advanced finishing system, the possibilities are mind blowing.

Powered by:

Showcase Logos & Images

CNC grooved panels, along with digitally printed images, can transform any wall into a feature wall in just hours.

Replicate Wood, Stone, & More

Advanced digital printing lets you create the appearance of mosaic tile, stone, wood, and more with stunning realism at a fraction of the price.

Logos & Graphics. On Tile? Seriously!

Patent-pending SmartSeam technology allows you to print large-scale graphics on our tile-look panels without visual breaks for a clean, eye-popping appearance!

Create or choose your graphic image.

Image is printed directly onto Symmetrix SmartSeam Panels.

With no need for division molding, your image remains clear and uninterrupted.

Revitalize your space in hours, not days, thanks to ultra-quick installation.

Get your groove on.

With so many grooved tile pattern choices, plus color, graphics, photographic and other options, there's no limit to what you can create simply, affordably—and now seamlessly—on a tile-look wall.

CHEVRON

CHEVRON
with Logo

HERRINGBONE

DIAMOND

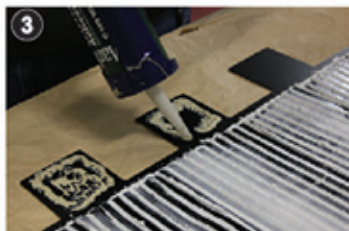

Install. In just a few hours.

FRP Panels are easily trimmed on a table saw.

Spread Adhesive over the back of the panel.

Create "swirl" patterns on the fingerlock joints.

Align the fingerlock joints and press panel to the wall.

Enjoy a seamless tile look wall that's tough to tell from real ceramic tile.

Symmetrix™ FRP Panels

marlite®
your world on a wall

THE LOOK OF CERAMIC TILE. THE ADVANTAGE OF SYMMETRIX™

Hey, we all love the look of tile. But we don't love the headaches of installation, replacement, damage repair, and maintenance. And that's where Symmetrix™ FRP really shines.

	Ceramic Tile	Symmetrix™
Easy to Install	✗	✓
Installs Over Virtually Any Surface	✗	✓
Impact Resistant	✗	✓
Never Needs Resealed	✗	✓
Easy to Clean	✗	✓
Low Cost	✗	✓

No messy demolition, no time-consuming and costly installs, and no special tools required.

So, why choose tile...When you can choose Symmetrix™

Symmetrix™ FRP looks like tile, installs easier than tile, outperforms tile,
AND costs less than most tile!

What in the World is Symmetrix™?

It's the look of tile on large, easy-to-install panels. Symmetrix™ is a smooth, Fiberglass Reinforced Plastic (FRP) panel, grooved with state-of-the-art CNC equipment to replicate ceramic tile. A Sani-coat sealer produces a durable surface and high-quality appearance.

Easy Peasy.

Installs in hours, not days over nearly any surface including existing tile.

BAM!

Fiberglass core provides serious impact resistance.

Tough Stuff.

Won't crack like ceramic tile grout, resists stains, mold, & mildew.

Wipe and Go.

Sani-coat Sealer makes entire surface easy to clean.

Installation: 1,2,3, then free!

FRP Panels can be easily cut with a table saw.

Apply Marlite Brand Adhesive to the back of panels.

Apply Panels to a prepared subwall.

Free! Enjoy the time you have left over.

Use only Marlite approved adhesives.

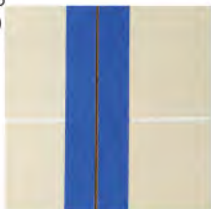

Seam Joint Installation

step 1

Place a 6 Penny spacing nail between panels.

step 2

After adhesive sets, remove nail and protect face with tape.

step 3

Place a bead of harmonizing sealant in the gap.

step 4

Using your finger, place a slight indentation in the gap.

step 5

Remove tape to reveal a grooved and matched seam joint.
